Before and After

David

- I had a substandard image of a mouse under a table. Look what "sharpen" did to it in Google's AI Gemini.

Graham

Before and After

I was a bit disappointed that photos taken of wild cats and primates were all through a thick wire mesh which obstructed the actual subject.

So, I asked CoPilot to remove the mesh, and this is the result.

Graham

Graham

Where Ai couldn't get it right.
By removing the wire mesh there is nothing left for the Gibbons to hang on to.

Graham

More Ai at work.

The first image was the original, and the others have been “fixed” by CoPilot.
